Date: March 9th 2026

Ref: JCGM (Joint Committee for Guides in Metrology) Working Group
On the International Vocabulary of Metrology (JCGM-WG2:VIM)

To: IFCC Full Member Societies' National Representatives
IFCC Affiliate Societies' Representatives
IFCC Functional Unit's Chairs

Dear Colleagues,

The IFCC calls for two laboratory professional willing to participate in the activities of JCGM-WG2.

The **Joint Committee for Guides in Metrology (JCGM)** comprises members from inter-governmental, standardization, and professional organizations of which the IFCC is one. It aims to create a common understanding and a framework for the basic metrological concepts that can be applied across physics, legal metrology, laboratory medicine and other areas. Concepts such as 'traceability' of measurement results and how to express 'measurement uncertainty' are examples of key concepts that need to be understood consistently, regardless of whether the measurement implications for health, commercial transactions, or safety issues.

Working Group 2 (WG2:VIM) of the Joint Committee for Guides in Metrology (JCGM) has responsibility for maintaining the International Vocabulary of Metrology (VIM). A corrected version of the third edition of the International Vocabulary of Metrology – Basic and General Concepts and Associated Terms was published in 2012 (JCGM 200:2012), and an "Annotated VIM3" (formally VIM Definitions with Informative Annotations) was published on the BIPM website in 2014. New annotations are added as and when they are approved by the Working Group.

The IFCC, as one of the member organizations of JCGM, represents the interests of the clinical laboratory field and ensures that field experience and requirements from this area are taken into account in the work of the WG.

Required Competencies for IFCC Representative on the JCGM-WG2 (VIM):

- Deep understanding of the medical laboratory discipline;
- Recognized and held in high regard by professional peers;
- Strong interest in metrology;
- In depth knowledge of calibrations, measurement procedure traceability, commutability, quality assurance, and measurement uncertainty;
- Record of high-quality publications;
- Membership in an IFCC Committee or Working Group is considered an advantage.

WG meetings are conducted primarily virtually, complemented by one in-person meeting held annually in Paris.

Information on the JCGM-WG2 and its activities are available on the website:
<https://www.bipm.org/en/committees/jc/jcgm/wg/jcgm-wg2-vim>

Nominations should be directly sent to the IFCC Office (elisa.fossati@ifcc.org) before **March 31, 2026**.

Yours sincerely,

Prof. Tomris Ozben
IFCC President

Prof. Sergio Bernardini
IFCC Executive Board
Secretary

Prof. Christa Cobbaert
IFCC Scientific Division Chair
